Software development life cycle (SDLC)

WORK EXPERIENCE

Web Developer Intern   Oct 2021 - Dec 2021
PAI College Of Veda l Pune
- Develop database- driven applications using WordPress, PHP, HTML, JavaScript, CSS, MySQL and SQL
- Research, analyze, implement and integrate new mechanisms and technologies within an interactive online environment
- Build APIs to aggregate local data
- Build new web-based features and interfaces

Software Developer   Sept 2022 - Now
CineTech India Enterprises
- I collaborate productively with the product team to understand requirements and business specifications around portfolio management, analytics and risk.
- Coding software updates and alterations based on detailed design specifications.
- I'm developing and presenting findings and solutions to audiences including senior executives and stakeholders.

PROJECTS

Online Examination System   Oct 2021 - Jan 2022
- This system's front-end is based on HTML5, CSS3, JavaScript, and Bootstrap 4 and the back-end is based on Core PHP and MySQL.
- This system provides MCQ-based exams and quizzes.
- I built this system to make exams easy to manage and make an organization's data centralized.

B2S-Local E-Marketplace   Feb 2022 - Jun 2022
- This system's front-end is based on HTML5, CSS3, JavaScript, and Bootstrap 4 and the back-end is based on Core PHP and MySQL.
- This is a classified ads website, where we can post ads and view ads to sell or buy things online.
- This system is built to give you the independcy to view and buy anything from your local area.

Sorting Algorithms Visualizer   July 2022 - August 2022
- This Project is built by using JavaScript.
- The whole aim of the project was to show my understanding of Front-end development and JavaScript.
- While working on this project I learned a lot about the JavaScript and JS Animations
